***Restriction/Election***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-17, 31-47, and 61-77, drawn to a method, system and program on computer-readable medium for preventing atypical clinical events using polymorphism information, classified in class 705, subclass 2.
- II. Claims 18-24, 48-54, and 78-84, drawn to a method, system and program on computer-readable medium for preventing atypical clinical events using genetic test results, classified in class 705, subclass 2.
- III. Claims 25-30, 55-60, and 85-90, drawn to a method, system and program on computer-readable medium for processing hereditary data, classified in class 705, subclass 2.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are separate and distinct. Although the methods of Groups I and II recite similar preambles, the method of each Group recites different method steps requiring different searches. As Groups I and II are directed to methods requiring separate searches, they are separate and distinct from each other. The method of Group III is directed to a different result and recites method steps different from that of either Group I or Group II, and is therefore separate and distinct from each of Groups I and II.

Because these inventions are distinct for the reasons given above and a different search is required for each Group, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
